Subject: Immediate discontinuation of models PRO-10 and PRO-20

Dear Husky importer,

After years of a solid reputation and great contribution to the success of the Husky brand, the PRO-10 and PRO-20 models will take a bow and make way for a new generation of wet & dry models. **In the wake of this end, we are pleased to announce the immediate availability of the new PRO-100 and the forthcoming arrival of the PRO-200.**

The PRO-10 and PRO-20 were highly-valued on the central vacuum market and we understand they represent big shoes to fill. This is why all necessary efforts were made to create the new generation of PRO models that will brilliantly succeed to the legendary PRO-10 and PRO-20.

Effective immediately, the new PRO-100 is available for order and delivery. However, the PRO-200 will be introduced, at latest, by the end of March 2014. Development and testing of the new PRO-200 are already well advanced and on schedule. A memo will be sent to announce the arrival of the new PRO-200 when it becomes available in early 2014. In the meantime, the other PRO Series models such as PRO-100, PRO-300, PRO-400, PRO-500 and PRO-600 are all available for immediate delivery.

Thank you for your cooperation.

Presenting the new 2014 Husky PRO Series!

Feel free to contact us if you have any questions regarding this product discontinuation memo.

Team **HUSKY**
